### **Brian Shedden, BSSO Principal**

#### **Entuitive**

At Entuitive, Brian Shedden is a Principal in the Existing Buildings group, delivering assessment and restoration services for a broad range of project types. Leading a team of 16 professional engineers, architectural and engineering technologists in the Alberta market, Brian is recognized by both our clients and the industry as a leading expert in the field of Building Science.

With a career spanning over 35 years in the building construction and restoration industry, Brian provides consultation and design for occupied buildings, condominiums, hospitals and long-term care facilities, schools and universities, high-rise commercial and residential buildings, and cultural projects.

His operational experience covers project delivery from start to finish: initial building condition assessments and performance failure investigations; reserve fund studies; building condition assessments; capital reserve planning; recommendations for restoration and renewal of building envelope systems; contract administration; project management; litigation support and expert witness services.

#### **Education**

Building Science Certificate Program, University of Toronto (2005)

Human Resources Management Diploma, Centennial College (1985)

Marketing Diploma, Centennial College (1983)
